

Energy Saving Services

- Low Energy Lighting
- Presence Detection
- Voltage Optimisation
- Combined Heat and Power (CHP)
- Ground Source Heat Pumps

More businesses than ever want to reduce their carbon footprint and most importantly their costs, which is why we are focused on providing solutions to reduce electrical energy consumption.

At SEE-Plc we undertake a full energy efficiency inspection so we can identify the areas that can save energy and money.

SEE-plc are committed to the continuous improvement of Company Environmental Performance

Shell – Harlow

As part of the green initiative SEE installed low energy LED lighting with presence detection.

Utilising the very latest energy saving technology and by employing best environmental practises SEE-plc can provide innovative solutions to reduce your carbon footprint and reduce running costs.
