

Testing & Remedial Works

- **Periodic Testing/Fixed Wire Testing**
- **Emergency Lighting**
- **Fire Alarm Testing**
- **Infra Red/Thermal Imaging**
- **Portable Appliance Testing**
- **Dilapidation Reports**

Electrical systems can be dangerous and can injure or kill as well as being the main cause of fire.

In accordance with the Electricity at Work Regulations 1989 all employers have a legal responsibility to protect those working in or visiting their premises. Paramount to meeting this legal obligation in preventing harm is managing and controlling risk.

In the event of an incident, apart from the disruption to your business, you will be required to produce records showing details of your inspections and the competency of the persons undertaking the works. SEE-plc qualified engineers are fully conversant with the latest rules and regulations relating to electrical testing.

Did you know?

Your insurance cover may be invalid if you fail to have your electrical wiring and appliances adequately maintained by a qualified and competent organisation.
